Summary

A fast learner and a passionate software developer with over four years of professional experience. Highly skilled in both front-end and back-end development. Well-versed in numerous programming languages including PHP, Java, MySQL and Node.js, and enjoy learning new languages and development techniques. Experienced in all stages of the development cycle for dynamic web applications. Delivered premium-quality applications that are still widely used and have achieved a good reputation among users.

Since completing a Master of Information Technology Professional at Monash University, I have continued to develop my skills in Web Application development position and demonstrated success on different projects. One of my successful projects was to build a task management system for ALDI. The system, called ASAP, was currently being used on more than 484 ALDI stores in Australia. I am confident with my abilities to increase website reliability, maximize promotion productivity, and improve system efficiencies. Besides, having outstanding communication skills makes me a good team player and easy to adapt to different working environments.
